### 2.3 Other hazards

The substances in the mixture do not meet the PBT/vPvB criteria according to REACH, annex XIII.

### Adverse human health effects and symptoms

Contains the following substances of very high concern (SVHC) which are included in the Candidate List according to Article 59 of REACH:

This product does not contain a substance that has endocrine disrupting properties with respect to humans as no components meets the criteria.

#### Adverse environmental effects

This product does not contain a substance that has endocrine disrupting properties with respect to non-target organisms as no components meets the criteria.

The substances in the mixture do not meet the PBT/vPvB criteria according to REACH, annex XIII.

Contains the following substances of very high concern (SVHC) which are included in the Candidate List according to Article 59 of REACH:

This product does not contain a substance that has endocrine disrupting properties with respect to non-target organisms as no components meets the criteria.

## **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

#### **General information**

In case of accident or unwellness, seek medical advice immediately (show directions for use or safety data sheet if possible). Remove contaminated, saturated clothing immediately. Wash thoroughly the body (shower or bath). Remove affected person from the danger area and lay down. Transport affected person in lying position, in case of shortness of breath in half-sitting position. Put victim at rest, cover with a blanket and keep warm. Do not leave affected person unattended.

### **Following inhalation**

Remove casualty to fresh air and keep warm and at rest. If breathing is irregular or stopped, administer artificial

according to Regulation (EC) No. 1907/2006 (REACH)

respiration. Call a physician immediately.

## In case of skin contact

After contact with skin, wash immediately with plenty of water and soap. In case of skin reactions, consult a physician. Immediate medical treatment required because corrosive injuries that are not treated are hard to cure. In case of skin irritation, consult a physician.

#### After eye contact

In case of contact with eyes flush immediately with plenty of flowing water for 10 to 15 minutes holding eyelids apart and consult an ophthalmologist. Remove contact lenses, if present and easy to do. Continue rinsing. Protect uninjured eye.

### **Following ingestion**

If accidentally swallowed rinse the mouth with plenty of water (only if the person is conscious) and obtain immediate medical attention. Do NOT induce vomiting.

#### Self-protection of the first aider

First aider: Pay attention to self-protection!

### 4.2 Most important symptoms and effects, both acute and delayed

Following inhalation Irritation to respiratory tract Pulmonary irritation Following skin contact Causes severe burns. erythema (redness) May cause an allergic skin reaction. After eye contact Causes serious eye damage. Following ingestion Causes severe burns. Gastrointestinal complaints Abdominal pain If swallowed danger of perforation of the esophagus and the stomach (strong corrosive effects).

## 4.3 Indication of any immediate medical attention and special treatment needed

Treat symptomatically. First Aid, decontamination, treatment of symptoms. Subsequent observance for pneumonia and lung oedema.

## **SECTION 5: Firefighting measures**

### 5.1 Extinguishing media

#### Suitable extinguishing media

Carbon dioxide (CO2) Extinguishing powder alcohol resistant foam Water spray jet Water

#### Unsuitable extinguishing media

Strong water jet

## 5.2 Special hazards arising from the substance or mixture

In case of fire may be liberated: Nitrogen oxides (NOx) Carbon monoxide Carbon dioxide (CO2) Ammonia (NH3) Phenols

### 5.3 Advice for firefighters

#### Special protective equipment for firefighters

Wear a self-contained breathing apparatus and chemical protective clothing. Move undamaged containers from immediate hazard area if it can be done safely. Use water spray jet to protect personnel and to cool endangered containers. Do not allow run-off from fire-fighting to enter drains or water courses. Collect contaminated fire extinguishing water separately. Do not allow entering drains or surface water.

#### **SECTION 6: Accidental release measures**

# 6.1 Personal precautions, protective equipment and emergency procedures

For non-emergency personnel

Use personal protection equipment. See protective measures under point 7 and 8.

## For emergency responders

Use personal protection equipment. Provide adequate ventilation. Remove persons to safety. See protective measures under point 7 and 8.

## 6.2 Environmental precautions

Do not allow to enter into surface water or drains. Do not allow to enter into soil/subsoil.

according to Regulation (EC) No. 1907/2006 (REACH)

## 6.3 Methods and material for containment and cleaning up

#### For containment

Cover drains. Stop leak if safe to do so. Absorb with liquid-binding material (sand, diatomaceous earth, acid- or universal binding agents). Take up mechanically, placing in appropriate containers for disposal.

## For cleaning up

Collect in closed and suitable containers for disposal. Clean contaminated articles and floor according to the environmental legislation.

#### 6.4 Reference to other sections

Personal protection equipment: see section 8 Disposal: see section 13

## SECTION 7: Handling and storage

## 7.1 Precautions for safe handling

### Protective measures

It is recommended to design all work processes always so that the following is excluded: Inhalation of vapours or spray/mists Skin contact Eye contact

Wear personal protection equipment (refer to section 8). If local exhaust ventilation is not possible or not sufficient, the entire working area should be ventilated by technical means.

#### Measures to prevent fire

Keep away from sources of ignition - No smoking. Keep away from sources of heat (e.g. hot surfaces), sparks and open flames.

#### **Environmental precautions**

Shafts and sewers must be protected from entry of the product. Provide for retaining containers, e.g. floor pan without outflow.

## Advices on general occupational hygiene

Working places should be designed to allow cleaning at any time. Floors, walls and other surfaces in the hazard area must be cleaned regularly. After use replace the closing cap immediately. Wash hands and face before breaks and after work and take a shower if necessary. Wash hands before eating, drinking or smoking. Remove contaminated, saturated clothing immediately. Wash contaminated clothing prior to re-use.

## 7.2 Conditions for safe storage, including any incompatibilities

## Technical measures and storage conditions

Only use containers specifically approved for the substance/product. Protect containers against damage. Keep container tightly closed and in a well-ventilated place.

### **Packaging materials**

Unsuitable container/equipment material: Copper Alloy, containing copper

#### Hints on joint storage

Storage class (TRGS 510): 8A

### Keep away from Acid Oxidizing agent

Keep away from food, drink and animal feedingstuffs.

## 7.3 Specific end use(s)

Observe technical data sheet.

### SECTION 8: Exposure controls/personal protection

If technical exhaust or ventilation measures are not possible or insufficient, respiratory protection must be worn. Respiratory protection necessary at: exceeding exposure limit values insufficient ventilation insufficient exhaust

## Suitable respiratory protection apparatus

Combination filtering device Filter type: A EN 14387

## Remark

The filter class must be suitable for the maximum contaminant concentration (gas/vapour/aerosol/particulates) that may arise when handling the product. If the concentration is exceeded, self-contained breathing apparatus must be used. Use only respiratory protection equipment with CE-symbol including four digit test number.

### General information

When using do not eat, drink, smoke, sniff, Avoid contact with skin, eves and clothes. Wash contaminated clothing immediately. Wash hands before breaks and after work. Emergency shower installed

#### 12.4 Mobility in soil

No information available.

#### 12.5 Results of PBT and vPvB assessment

The substances in the mixture do not meet the PBT/vPvB criteria according to REACH, annex XIII.

#### 12.6 Endocrine disrupting properties

Contains the following substances of very high concern (SVHC) which are included in the Candidate List according to Article 59 of REACH:

This product does not contain a substance that has endocrine disrupting properties with respect to non-target organisms as no components meets the criteria.

#### 12.7 Other adverse effects

No information available.

## **SECTION 13: Disposal considerations**

#### 13.1 Waste treatment methods

Dispose of waste according to applicable legislation. The allocation of waste identity numbers/waste descriptions must be carried out according to the EEC, specific to the industry and process.

Collect the waste separately. Do not empty into drains, dispose of this material and its container at hazardous or special waste collection point.

Handle contaminated packages in the same way as the substance itself.
